From 01-12-2022	17,005,375	425,000

This overview is updated on a monthly basis. No rights can be derived from this overview.

The maximum technical capacity of the BBL pipeline is currently 17,005,375 kWh/h.

The expansion project means that a fourth compressor will be installed. As a result the maximum technical capacity of the BBL pipeline will be around 20,600,000 kWh/h from 1 December 2010 onwards.
