Dear Rudi

BBL interconnector - change of direction of physical flow

We have been discussing the requirements for changes in the direction of physical flow over the BBL interconnector, and the fact that shipper nominations are proving to require such changes more frequently and at shorter notice than originally anticipated. Paragraphs 8.1(a) and 8.2 of Appendix 2 to the Interconnection Agreement ("Network Exit") set out how you are to notify to us each such change.

Paragraph 8.1(b) of Appendix 2 to the Interconnection Agreement expresses our mutual preference for changes to occur at the start of the Day and (if not taking effect from the start of a Day) on a weekday in GB.

We are writing, following our discussions, to acknowledge that:

a. what is set out in paragraph 8.1(b) of Appendix 2 is a mutual preference of the Parties, and not a rule binding the Parties;

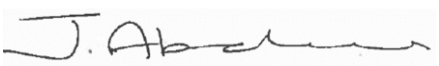

b. in the circumstances of current shipper demand for changes of physical flow direction, each of us accepts the need for changes which may occur within Day, and potentially within Day on Days which are not weekdays;

c. the mutual preference in paragraph 8.1(b) does not operate to prevent you from giving notice as required by paragraph 8.1(a) of a change within Day, including on a Day which is not a weekday, where required by shipper nominations.

This letter does not amend the Interconnection Agreement, and its provisions remain in full force and effect including the requirements in paragraph 8 of Appendix 2 for notice of changes in flow direction.

Please confirm our understanding by signing below.

Yours sincerely
